Laboratory Conference Network is Born!

An Association of International Exhibitions and Conferences Providing Support to the Laboratory Market

Pittsburgh, PA – March 2026 – At Pittcon 2026, representatives from four major global laboratory science conferences will announce the formation of the Laboratory Conference Network (LCN), a worldwide association of Exhibitions and Conferences in the fields of Analytical Chemistry and Laboratory Science. Through the exchange of ideas and best practices, the members of the LCN will provide innovative products and services to their exhibitors and attendees.

The LCN was started with four Charter Member Conferences: Beijing Conference and Exhibition on Instrumental Analysis (BECIA), Korea Lab, Lab Indonesia and Pittcon. Membership of the LCN is open to Conferences and Exhibitions who promote products, services and provide a forum for the exchange of scientific ideas in the areas of analytical chemistry and laboratory science.

The LCN has secured the URL *labconferencenetwork.com* and a web page is under construction. The LCN is also working on establishing its presence on LinkedIn and other social media platforms. Each LCN member will also provide a link to each member's website on its website. Member Conferences will also participate in joint promotion opportunities.

"Many of us from various International Conferences have been meeting and exchanging ideas on an informal basis for several years now. So, it seemed a natural extension to create a more formal structure for this idea exchange. The LCN provides this structure which will ultimately benefit the scientists that each Conference serves." said Dr. Chuck Gardner, Pittcon's International Relations Chair and representative to the LCN.

"We are confident that the LCN will become an ideal model for the conferences and exhibitions across the analytical science and laboratory sectors. It will serve as a key platform for us to enhance our visibility, share insights, and foster collaboration." Said Ms. Wang Liying, Director-International and Academic Exchange Departments, China Association for Instrumental Analysis and representative to the LCN.

The LCN will be formally introduced at a Press Conference being held at Pittcon 2026 in San Antonio on Tuesday, March 10 at 3:00 PM CST.

About BCEIA

Founded in 1985, the Beijing Conference and Exhibition on Instrumental Analysis (BCEIA) is organized and developed by the China Association for Instrumental Analysis (CAIA). Since its launch in 1985, BCEIA has been held biennially, with 21 successful editions staged over more than 40 years. BCEIA is a world-renowned event in the analytical and testing community and continues to set the pace for academic innovation and industrial upgrading, featuring top-tier academic exchanges, forward-looking technology showcases, and in-depth cooperation dialogues.

About Korea Lab

KOREA LAB is Korea's leading B2B exhibition dedicated to laboratory, analytical, biotechnology and life science technologies. Held twice annually in Korea, the Spring edition (www.korealab.org) and the Autumn edition, hosted within Korea Life Science Week (www.lifescienceweek.com), together provide a comprehensive platform covering the full spectrum of laboratory equipment, analytical instruments and research solutions. The event connects global suppliers with key buyers and decision-makers, serving as an important gateway to the Korean and broader Asian markets.

About Lab Indonesia

Lab Indonesia has established itself as the premier B2B trade exhibition for future laboratory technology and chemicals serving the medical, pharmaceutical, educational, and scientific research sectors in Indonesia. Since its inaugural edition in 2010, Lab Indonesia has been committed to showcasing the latest trends, innovative products, and groundbreaking technologies. The exhibition provides a distinctive platform to explore advancements and strengthen engagement within the laboratory industry.

Whether your objective is to gain access to cutting-edge products, network with industry leaders, or acquire valuable insights through a series of informative conferences, seminars, and workshops, Lab Indonesia offers a transformative and enriching experience.

As a trusted platform for professionals, industry players, and stakeholders in the laboratory sector, Lab Indonesia remains dedicated to fostering limitless business opportunities and contributing to the positive growth of the laboratory industry in Indonesia. The 8th edition of Lab Indonesia is scheduled to take place from 15–17 April 2026 at the Indonesia Convention Exhibition (ICE), BSD City, Indonesia.

About Pittcon

Pittcon is a dynamic, multinational conference and exposition on laboratory science, a venue for presenting the latest advances in research and scientific instrumentation, and a platform for continuing education and science-enhancing opportunity. Our aim is to advance scientific endeavor through collaboration, bringing together a world of knowledge to impact, enrich, and inspire the future of science. Pittcon is a catalyst for the exchange of information, a showcase of the latest advances in laboratory science, and a venue for international connectivity. Over 90% of Pittcon's annual net profit funds scientific grants, education, laboratory improvements, and outreach. pittcon.org
