

Dear PBNC 2020 Participant,

The PBNC 2020 organizing committee has been working looking for a successful meeting, the first option was to postpone the conference from April to October, 2020. And we proceeded with the hotel negotiations for that change of dates.

However, there is a big uncertainty about the evolution of the COVID-19 in Mexico, and what could be the restrictions for human interaction in a Conference like this by October 2020. In addition possible COVID-19 rebounds could happen by that time. The Mexican Nuclear Society wants to privilege human health and it considers irresponsible to continue to hold the conference as it was planned.

After too many discussions and the consideration of several possible alternatives we regret to announce you that the PBNC 2020 conference in Cancun, Mexico will be cancelled.

We want also to inform you that all the submitted papers will be withdrawn from the Conference and you are free to use your paper at your convenience.

We look forward to have the opportunity to exchange ideas by the contact with new and old friends at future Pacific Basin Nuclear Conferences.

Sincerely yours,

Gustavo Alonso

General Chair, PBNC Chair
